Project Management

Jan 2018 - Feb 2019 **Russian CT Co**
Senior Full Stack Developer

Russia, Moscow

Design and development of the Eagle Eye program for the Russian CT company.

Management of Russian programming team.

Eagle Eye is a program to detect and prevent hacker attacks using artificial intelligence.

The technologies used are C, Node.js, PHP, React.js, Cassandra, Redis, PostgreSQL.

In this way, if the hacker attacks the site or system, the eagle eye program will detect the attack using artificial intelligence and the hacker will be blocked.

This program is much more advanced than IDS, IPS

Because these do not have artificial intelligence and only work using pattern.

Mar 2013 - Mar 2016 **Ghasedak Samaneh**
